## Problem of Shoes Shope

The shoes shopkeeper has a challenger in tracking stock level, maneging every records of preventing stockover. They also fell issue with delay., In the price of competition they have to balance the competative pricing with propibility. They have to also manage costomer service for satisfaction handaling a positive shopping experience. They also need to check the quality of the product. They also have problem of managing everything, like a cash flow for operational stabulity of growth for that.

Analysis :-

They have 50 to go customers purches a shoes daily.

Problems :-

under next few days.
